

INSURPATH™ API

Our Next-Gen Solution for Insurance Submission

State National's innovative InsurPath™ API integration enables borrowers to check their insurance status and update their coverage details directly through their online banking platform — an industry first.

A First-of-Its-Kind Solution for Both Lenders and Borrowers:

- » Immediate, consistent borrower communication
- » Seamless integration and customization for lenders
- » Quick visibility of coverage and certificate status for lender staff
- » Reduced flat-cancel rates (fewer reversed or refunded certificates)

With user-friendly interactive pop-ups, the InsurPath API integrates with all online banking platforms, giving borrowers the power to:

- » View their current insurance status in real time
- » Instantly submit insurance information
- » Set "Remind Me Later" alerts or opt out with "Don't Show Me This Again"

Fast Implementation, Lender Messaging Options

Designed for fast, efficient deployment, InsurPath allows your institution to go live quickly. Lenders can also customize the communication displayed within the online banking environment.

Proven Results:

Within just 4 months of utilizing State National's API data in their online banking communication integration, SELCO Community Credit Union achieved notable conversion rates from uninsured or inadequately insured statuses to compliant coverage:

- » **74%** conversion from no insurance
- » **53%** conversion from final notice status
- » **47%** conversion from active CPI

"I want to thank State National for being such a great partner and willing to invest in opportunities to reduce friction for our members and our teams. State National truly lives the Kaizen Philosophy of continuous improvement through incremental, ongoing changes. I am grateful to have such an invested and thoughtful partner."
